

You are cordially invited to attend a free symposium supported by ADInstruments

Blended Learning in Labs and Lessons

Academics from Australasia will provide insight into the use of educational technology and online platforms including those using real time ('live') data acquisition with a particular focus on assessment design in blended learning.

Keynote speaker Associate Professor Gwen Lawrie will discuss the delivery of inclusive online learning environments that support student learning on-campus and reveal for us how things can go wrong!

Workshops will include:

- Making your Technological Pedagogical And Content Knowledge (TPACK) visible
- Working through Strategic Alignment
- HOW2MCQ

Keynote speaker: Associate Professor Gwen Lawrie

Gwen Lawrie is an Associate Professor in the School of Chemistry and Molecular Biosciences (SCMB) at the University of Queensland (UQ) and also the Director, First Year Chemistry (Curriculum & Assessment). She gained a BSc (Applied Chemistry, Hons) from Sheffield Hallam University (UK) in 1986 and a PhD from Cranfield University (UK) in 1990.

Gwen has been the recipient of the 2017 Chemistry Education Division Medal; 2013 Pearson RACI Educator of the Year Award; a 2013 OLT Australian Award for University Teaching; a 2012 UQ Award for Teaching Excellence; a 2012 UQ Teaching Fellowship and a 2011 Faculty of Science Teaching Excellence Award.

Successfully translating from a bench chemistry research career into chemistry education research, her projects to date have included addressing the diversity and engagement of students through collaborative inquiry tasks; and mechanisms for provision of formative feedback to support self-regulated learning in online environments. Gwen has published multiple peer-reviewed articles and several book chapters in chemical education research.

THE UNIVERSITY OF
SYDNEY

11 December 2017

9.30am registration for
10am – 4pm

Charles Perkins Centre
University of Sydney

RSVP

Registration is free but as spaces are limited, bookings are essential. Please RSVP by 7 December at:
